From standard windows programs click a link highlighted in Fig.1

Type a first program in TC editor window, then choose Compile option from main toolbar

```
#include <stdio.h>
void main(void)
{
    printf("Hello World);
}
```

🔀 Turbo C++					
<u>File E</u> dit <u>S</u> earch <u>R</u> un	<u>Compile</u> <u>Project</u>	Browse	Options	<u>W</u> indow	Help
? ┡┽┿ ┣ 🄊 🔊 🖇	Compile	Alt+F9	9		
<pre>C:\tcwin\bin\wo #include <stdic main(void)="" pre="" printf("hellc="" void="" {="" }<=""></stdic></pre>	Make Link Build all Information Remove messag	F9 jes			

Then you will get error messages with indications where exactly mistake is found.

First fix encircled by putting double quote as:

Finally, run program after fixing indicated error and save file in a specific directory. Fig. 4
