- **True or False problems.**

1. One of the problems that we are facing in building Arabic corpus is the same word different meaning.
2. In the process of assessment corpus Ideally a simple graph will show a straight line with a slope –1.
3. after collecting data for a corpus we convert the data to a common encoding.

- **A summary of your lecture.**

My presentation is basically about the process of building an Arabic corpus:

- collect data.
- Collection processing.
- Corpus Assessments.

- **Problem I faced**

I did not face any problem except perhaps the time problem

- **List of references**
