

Homework Format

Homework paper must have a header on the first page and one on the back of the last page (see an example below). You have to staple the sheets together. On the first page, write your Class-S/N* and your name. Then draw a line and start solving the hw problems (you can have a cover page if you want, but we better save paper!). On the back of the last page, write the course number (ICS354), then write your ClassSN - your name - ID, and HW# on the top-right corner, right under the staplers (as shown below). Then vertically fold the sheets all together such that the header on the back of the last page is outside.

* Class S/N is the unique serial number assigned to you by the instructor on Week 3. Please email your instructor if you don't have a Class S/N yet.
